Mrs. Clackson had a very narrow last month. The special train they travelled from Haverhill for the Meeting in the had only passed under atone the carries the Mold road over about an hour, when the strangled and fell on the line.

It is that our friend Dr. obtained a patent for his "Carriage" is a most useful invention the attention of the tramway to it, as well as the S.F.T.P.O. invention consists of a lever attached to the wheels, enabling to give an initial propulsion and afterwards remaining stationary, the inertia. All who the use of the machine are its favour.

It is now so great for small

the tramway guards actually per cent to the "almaceneros" which brings down this eight- to close on six cents. How for the tramway companies to return of a necessity and reduce to five cents, as was done by his North and South branches at Central Line. In this way city companies would confer an boon on the public, and, far from their receipts, would position them by their liberal policy. Here is the crisis that even the have to keep a very sharp eye and dispensed one cent piece.
